SUMMARY

Frontend Engineer with 1.5+ years of hands-on experience building responsive, high-performance web applications using React.js, Next.js, and React Native. Proficient in Redux Toolkit, Tailwind CSS, and REST API integration. Passionate about crafting clean, user-centric interfaces that bridge design and functionality.

SKILLS & EXPERTISE

- | | | | |
|--------------|-----------------|----------------|--------------|
| • HTML5 | • REACT.JS | • REACT NATIVE | • NODE.JS |
| • CSS3 | • NEXT.JS | • BOOTSTRAP | • EXPRESS.JS |
| • JAVASCRIPT | • REDUX TOOLKIT | • GSAP | • SUPABASE |
| • TYPESCRIPT | • TAILWIND CSS | • GIT & GITHUB | • FIREBASE |

PROFESSIONAL EXPERIENCE

Getweys

August, 2025 – Present

Software Developer / Full-Time

- Design and scale the frontend architecture of high-performance web applications using React.js, Next.js, and Tailwind CSS to ensure long-term maintainability and clean code structure.
- Optimize application efficiency by enhancing rendering speeds and load times while managing complex UI states with Redux Toolkit.
- Crafted premium web experiences by implementing smooth, high-end interactive animations using GSAP (GreenSock) to elevate UI/UX.

Fast Technology

June, 2025 – July, 2025

Frontend Developer Intern / Full-Time

- Built reusable UI components using React.js and Tailwind CSS, improving dev team efficiency
- Assisted in API integration and client-side state management for dynamic web features.
- Gained real-world exposure to agile workflows, code reviews, and production deployments

EDUCATION

University of Karachi — BS Computer Science | 2026 – 2030

- Building a strong foundation in software engineering, web development, and computer science fundamentals through academic coursework and hands-on projects.

CERTIFICATES

- | | |
|---|--|
| • Cisco International Certificate
Jawan Pakistan | • Frontend Development
PNY Training |

PROJECTS

Casho.ai

- Engineered an AI-driven financial platform that automates invoice, quotation, and expense report generation using advanced natural language processing (NLP) for text and voice inputs.
- Architected a secure backend infrastructure leveraging Supabase for robust user authentication, role-based access management, and real-time database synchronization.
- Optimized application scalability to process real-time workflows efficiently, delivering a fast, seamless UX tailored for freelancers and enterprise businesses.

Blade Rush

- Designed and engineered an immersive, cinematic landing page featuring complex, high-end 3D visual dynamics and gaming aesthetics.
- Implemented advanced scroll-linked interactions and micro-animations using performance-optimized frontend techniques to deliver an engaging, fluid user journey.
- Optimized media assets and layout performance to ensure seamless, low-latency responsiveness and pixel-perfect rendering across all devices.
